MONDAY, NOV. 17, 1856.

It is kept out of sight as much as possible, but the fact is, this ridiculous [Clayton-Bul-wer] treaty binds the United States to protect all contractors for a mail and passage transit across the American Isthmus from "seizure and confiscation." The corsequence of this stupendous blunder of American diplomacy is that our Government is bound to reinstate the late Accessory Transit Company, which the Walker-Rivas government seized and confiscated, or it must pay the damages resulting to the company.— Washington dispatch.

The dispatch adds that "Davis, as well as Cushing and Marcy and one it not two Judges of the Supreme Court, own that the United States are bound to this by the express conditions of this sapient Clayton Bulwer treaty." Now our distinct impression is that this whole thing is a mistake. The Clayton Bulwer treaty imposes no such obligation upon the United States, and we do not believe that any respectable authority asserts the contrary. The affair as probably nothing more than a pure figment of the imagination of some Washington quid nanc. It cannot have the slightest foundation in fact. It certainly has none in the Clayton-Bulwer treaty. The only provision of that instrument which could have suggested such a notion is the one which contemplates an extension of the protection of the two governments to other inter-oceanic communications than the canal which formed its special subject. But that was simply an abstract agreement, depending upon subsequent stipulations which have never been negotiated. The provision is therefore practically null. Its larguage is as fol-

The Government of the United States and Great Britain, having not only desired, in entering into this convention, to accomplish a par-ticlar object, hut also to establish a general prisciple, they hereby agree to extend their protection, by treaty slipulations, to any other practicable communications, whether hy canal or railway, across the 1sthmus which connects North and South America, and especially the inter-oceanic communications, should the same prove to be practicable, whether by canal or railway, which are now proposed to be established by way of Tehuantepec or Panama.

Since the "treaty stipulations" here mentioned have not been entered into, the protection of the two governments, as regards "any other practicable communications" across the isthmus, of course remains in abeyance. There is nothing of it. But if there were everything phenson, and others of note, have given oplnof it, if the protection of the United States and other inter-oceanic communications, if the Transit route stood in exactly the same relation to these governments that the ship canal would stand if It were in existence, even then it is hy fixed fact. no means clear that the Accessory Transit Company would have a valid claim upon our government. On the contrary, it is tolerably clear that they wouldn't have. The protection stipulated by the treaty contemplates "unjust seizure and confiscation," and not lawful seizure and confiscation under civil process at all. It could properly contemplate no other sort. It would be a monstrous stretch of assumption, indeed, for one State to draw a line of enchantment around a powerful company in the heart of another and exempt it from all or from any responsibility to the native laws and govent. The treaty perpetrated no such ener-

It is therefore highly probable that the Transit Company would have no claim upon the Government in any event. It is abundantly clear that it has none in the actual event. The Hotel. The duel matter comes up again on Washington dispatch is undoubtedly a fiction. Friday.

The state of the s

THE RAILROAD VOTE TO-DAY -A vote of | the stockholders of the Louisville and Frankfort Railroad Company is to be taken to-day upon the proposed union of the management of the Louisville and Frankfort and Lexington and Frankfort roads. The arrangement has already been agreed upon hy the officers and directors of the two companies and it is now subjected to the stockholders for their appro val and ratification. The election will be held at the depot in this city, on the part of the stockholders of the Louisville and Frankfort Company, from 9 A. M. till 4 P. M. This subject has long been canvassed among the stockholders and nearly all of them have approved the arrangement, but before it goes into effect the sanction of the owners of a majority of the stock is required, and for this reason all who are interested in the success of the company should be certain to give their votes.

There can be no doubt of the mutual advantage to both companies from the proposed arrangement. Their current expenses will be greatly reduced, their interests will be identified, and the husiness increased. There will be a great saving in time, and the necessity for separate machine shops and distinct sets of employees will be removed. The aggregate earnings of hoth roads will be materially increased and equitably divided in proportion to the length of the respective roads. The benefits to be derived from the new arrangement are palpahle, and the officers and many of the princlpal stockholders have been for a long time anxious for its consummation. The gentlemen by whose efforts it has at last been effected deserve great praise for their active zeal in promoting the interests of these roads.

It should not be forgotten that all the stock this election, and we recommend all the stockholders to attend the meeting and cast their votes. The stockholders of the Lexington company voted upon the proposition on Seturtion of the boards of directors almost unani-

TOur neighbors in Cincinnati express serious apprehensions of suffering on account of the small supply and high price of fuel. The scarcity of coal has occasioned the suspension of some of the large manufacturing establishments and thrown out of employment a number of poor people, who have no means with which to purchase fuel and must necessarily be exposed to great hardship should the cold weather set in hefore the river rises sufficiently for the navigation of coal-boats. The propriety of furnishing the capital to enable a company to open coal-mines on the line of the Marietta rallroad and to procure the rolling-stock necessary for its transportation has been seriously considered. It is estimated that the coal thus procured would cost eighteen cents per hushel in Cincinnati. The citizens of Louisville should take warning now from this state of affairs. The Ohio river is too uncertain to be allowed to remain our sole reliance for a supply of fuel. The expenditure of a small amount of capital and a very little energy will place us in communication by railroad with inexhaustible deposites of excellent coal, whence we would always be certain of a supply and at a less average cost than we now pay for Pittsburg coal. We hope the present season will not pass without some definite action upon the subject by men who can and will attain the quake had taken place, which was felt through-

TELEGRAPHIC COMMUNICATION WITH EU-RCPE -This magnificent line of telegraphic communication is now complete hetween New York and St. John's, Newfoundland. The distance, following the telegraphic wires, is 1,715 miles. The submarine extension of the line across the Atlantic to Galway, Ireland, a distance of 1,600 miles, will, it is said, he carried out successfully before the close of the ensuing summer. A company for the purpose of carrying it out has been formed in London, under the auspices of Cyrus W. Field, Esq., of New York, and Sir John W. Brett, a distinguished English Engineer. One-third of the stock required for the completion of the enterprise has been already taken up, and capitalists of all ranks and in every quarter of the commercial world stand ready to take up the balance. Doubts of the feasibility of the scheme no longer exist. The Engineers Brunel and Steions in favor of its practicability, and offered Great Britain had been actually extended by to take a pecuniary interest in it. The last the requisite treaty stipulations to any and all misglvings have risen like shadows from this grand enterprise, incomparably the grandest of the age, and we may now look confidently for its completion in the immediate future. It is a

> ILLINOIS .- Advices from Springfield, Illinois, state that the official reports of the election result from ninety-seven counties have been received. Buchanan's majority in these counties is only 1,297. Bissell is 7,624 ahead. The remaining counties to be heard from are Crawford, Edwards, and Wayne.

> The Legislature, it is said, will stand: Senate -Republicans 12; Democrats 13. House-Republicans 32; Democrats 37; Americans 6.

The Mayor of Richmond on Monday held Mr. Roger A. Pryor and one of the seconds in the late duel in \$3,000 each to answer for an assault upon O. B. Finney, before the Hustings Court the following day, and in a like sum to keep the peace for twelve months. The assault is charged to have taken place in the Exchange

FREE NEGROES CANNOT BE CITIZENS-Important Decision .- The right of citizenship and we noticed the shipment from Liverpool of the right of suffrage are often confounded. some very valuable live stock for R. A. Alex-They are by no means synonymous, nor even dependent upon each other. Citizenship can be conferred only by the Federal Government, and is everywhere the same throughout all the States. The right of suffrage is derived from and controlled by the several States, and different qualifications are required for it by different States. It is a mistaken idea that citizenship of itself gives also the right of suffrage, and the right to vote does not always imply citizenship. In Kentucky, a man may be a citzen hut will not be allowed to vote until he has become qualified by his compliance with certain requirements of the State constitution. In some of the other States negroes and foreigners are permitted to vote without being citizens. The negropholists of the North, in their foolish efforts to abo lish slavery and make free negroes of all the slaves of the South, seem to suppose that the objects of their misguided philanthropy would then be entitled to citizenship. The following decision of the Secretary of State will undeceive them. Under the constitution, persons of color cannot become invested with the rights of citizens. It was rendered under the following circumstances: A few weeks ago, application was made to the State Department for foreign pass orts for eleven persons of color, composing a troupe of minstrels, who were about to start on a professional tour to Europe. The necessary papers and certificates were forwarded with the application. From these, it appears that tine of these persons were born in the State of New York, one in Philadelphia, and one in Portland, Me. Concluding that there would be no not voted will be counted in the negative in difficulty in obtaining passports from the Department, the troupe left, by the Hermann, with the intention of remaining at Bremen until they received their credentials, which their agent here was instructed to forward after day last and adopted it and confirmed the ac- them. This expectation has been disappointed interesting, as we understand that he will take by the receipt of the following communication occasion to explain the objects of the school to the clerk of the court in New York:

by the receipt of the following communication to the clerk of the court in New York:

Deparation of the court in New York:

Washington, November 4, 1836.

H. H. Rick, Esq., New York City—
Sir: Your letters of the 29th ultimo and 3d insl., requesting passports for eleven colored persons, having teen received, and I am directed by the Secretary to inform you that the passers transmitted by you do not warrant the department in complying with your request.

A passport is a certificate that the person to whom it is granted is a citizen of the United States, and it can only be issued upon proof of this fact. In the papers which accompany your communication, there is not satisfactive vidence that the persons for whom you request passports are of this adserption. They are represented in your letter as "coordes," and described in the affidavite as "b ack," from which attements it may be fairly inferred that they are not citizens of the United States. The question whether free negroes are such citizens is not now presented for the first time, but has repastedly arisen in the administration of both the national and State governments. In 1821 a controversy arose as to whether free persons of color were eit reus of the United States, within the intent and meaning of the acts of Congress regulating foreign and coasting trade, so as to be disqualified to command vessels, and Mr. Wirt, Attorney General, decided that they were not; and moreover held that the words "o tissue of the United States" were used in the seas of Congress in the same some as in the Coustitution. This view is also fully sustained in a recessive plulion of the present attorney General.

The judicial decisions of the country are to the same of coordinates of the United States, and the same of coordinates of the Coustitution of the present attorney General.

The judicial decisions of the country are to the same of coordinates of the United States, and free persons of color, it is conceived that they cannot be regarded, when beyond the jurisaletion of the Uni

EARTHQUAKE-TERRIBLE EFFECTS. - The Baltic hrings intelligence that a severe earthout Egypt. Two hundred houses were demolished in Caire. The city of Rhodes was in ruins. Some damage was also done in Smyrna. Fortunately hut few lives were lost. The earthquake also did great damage in Malta, Messina, Pezzalo, Syracuse, Catania, Candia, Cerigo, Gran Michel, and other places in the Mediterranean. Houses, churches, and mills were reduced to ruins. Fifty lives are known to have been lost. Several vessels and steamers in the Mediterranean felt the shock severely. On board many of the steamers the machinery was stopped. The shocks extended from the 11th to the 16th of October. During the whole time Mount Etna was emitting dense volumes of smoke. In various parts of Italy, also, the shock was felt. At Brindisi the people put to sea in boats. At other places the people fled from their houses and encamped for many days in the fields. Another shock visted Naples on the night of October 16th, causing great consternation among the inhabitants.

M. CABET .- M. Cahet, the communist, and chief of the Icarian Community at Nauvoo, died in St. Louis last Sunday week. He was once the associate of Louis Blanc and other eminent French Socialists. His principles made it necessary for him to leave France after the revolution of 1848, and he came to America to give to his social theories a practical exemplification. A portion of the colony he hrought over with him, first went to Texas, hut all were finally brought together at Nauvoo, where, from the year 1848 up to the present time, they lived upon community principles, or, in other words, had all things in common."

For several years the community seemed to be prospering, occasional visitors reporting favorably of its condition, but during the last two or three it has been rent by internal dissentions, an influential minority siding with Cahet, and managing to control the refractory majority.

The funeral procession of the late Willis Stewart yesterday was one of the most imposing we have seen for a long time. The memhers of the Masonic Order, of which the deceased was a member, turned out in very large numbers.

IMPORTATION OF STOCK .- Some weeks 2go ander, Eq., of Woodford county, Ky., probably the greates dealer and trader in America, and some gertle nen at the East. The ship Antarctic, baving this stock on board, arrived at New York on Thursday.

The most remarkable animal in the lot is the celebrated race horse Scythian, purchased by Mr. Alexander, whose pedigree and performances are well known to the sporting world. He was winner of the following prizes: New Market Stakes £350; Dee Stakes, Chester, £750; Goodwood Stakes, £950; New-Market Royal Stakes, £1,240; Chester Cup, £2,775. Stockton, £530; Goodwood, £539

Mr. A. has also on board several ewes valued at \$50 to \$65 each, and a ram that cost over \$40. He has also some excellent pigs, three of which cost \$75. Among the cattle are three heifers purchased from Col. Townly, one of them being the daughter of the famous bull Master Butte fly, which took the first prize at the Chelmford meeting, and was purchased for 1,200 guineas. The Antarciic has also a collection of birds for Mr. J. J. Bowers of Balti-

It has been reported that the wharfmaser has been instructed not to collect whatfage from any boat lying between Second and Brook streets, as the property belonged to Preston's heirs. The owns, however, the whole with the exception of three lots, each of 50 feet front, which belong to the heirs. The city ought by all means purchase these lots, and then make the property available.

THE INAUGURATION OF PRESIDENT OF THE NCRMAL SCHOOL -The inauguration of Dr. Lewis W. Green, as president of the State Normal School, at the University in Lexington, will take place to-morrow.

The address of the president will he very and the mode in which It is proposed to effect

The Legislature of Arkansas met at Little Rock on Monday and organized by the election of John R. Hampton as President of the Senate and Samuel Mitchell as Speaker of the House of Representatives. The Governor's message is devoted mostly to the affairs of the defunct banks and swamp lands.

A report was in circulation on Saturday that the Bank of East Tennessee had failed. The report was based upon a dispatch received from Paducah hy the captain of one of the Tennessen river packets. We made inquiry at several of the banking houses, but they did not know anything of it.

CINCINNATI HOG MARKET .- A private dispatch from Cincinnati, dated Saturday evening, says: "Sales of hogs at \$5 75. Mess pork sold at \$14 75."

A private letter from Paris says that Mr. Mason, United States Minister at the French Court, has entirely recovered from the severe atta ik of illness he suffered some time ago.

Valentine Austin was killed at Memphis by the premature discharge of a cannon fired in honor of Bachanan's election.

The alarm of fire last evening was false. [For the Louisville Journal.] BEAUTIFUL SEA!

Beautiful sea-Oh! beautiful sea! What spill hast thou o'er that faithless trust That leaves the maiden a check of dust, And a glazed eye, whose forbidding gloom She is gone from the earth—she has left but a name For the sex'ou's duil record, but thou art the same, Beautiful sea-Oh! beautiful sea!

Glaricus tea-Oh! glorious sea! Who made thee so fearless and boil and strong. And taught thee the victor's triumph sat sour The chivairous warrior has laid him down On the field of death with his helmet ou, And the grass waves green where a soldier's blood Has bathed the soll with its purple flood, warrior's shout has been silent long, Glorious sea-Oh! giorious sea

Miseriy sea -Oh! miserly sea! Poor man would toil for thy heaps of gold 'fill his head was gray and his heart was old;
He would store it away in his iron box
And fasten it down with his iron locks;
But the time must come—yea the lime is here,
When he locks around for his chosen heir; Then woru with toil and weak end blind Hast kept thy gold since the world begun, Mistrly sea-Oh! micorly sea!

Dauntless sea-Oh! dauntless sea! , Mighty the pulse of that heart must be, That could bear the fieres storms that swept ever thee; Poor man often brings a brave heart to the strife, But he comes from the conflict aweary of life, And the stray gleams of sunshine that hap! y may lurk Midst the mouldering remains of that excellent work, Reveal the dark foot-prints of sorrow, but thou Hast the gladuses of youth on thy bine-veined brow, Dauntless sea—Oh! dauntless sea!

Beastful sea—Oh! beastful cea! There is one who could whisper a word that would hold The pulse of thy senl, be it ever so bold; Who could speak to the storm, sweeping over thy breast, And the winds would sink down like an infant to rest Who could gither thy waves in the palm of His hand Aud scatter them forth like a mist e'er the land; Who could send one giance from His burning eye
That would search thy brow till its voins went dry,
Boastfui sea-Oh! boastfui sea!

Secrnful sea-Oh! secrnful seai Thou hast carled thy waves in a haughty frown
And laughed in derision when man sauk down;
Thou hast seen, when the clouds came fast and thick, Thou hast seen, when the clouds came fast and this that his brain grew weak and his heart fell elek; But He who shall bld thy glory depart, Will lay His hand on thy paleied heart, And the wearied pulse shall revive again, And the mists shall see from the darkened brain, While the anthem that bursts from a delified soul Shall be the death-dirge to thy la wisse control, Scoraful sea—Oh! scoraful sea:

Among the patents issued for the week ending on the 11th inst. was one to Henry Bessemer, of London, England, for improvement in the manufacture of iron and steel.

RIVER AND STEAMBOAT MATTERS.

The river was about at a stand last evening, with fully 31 feet water in the canal. The weather yesterday was very cold and cloudy. The steamer Moses McLellan is the mailboat

for Cincinnati to-day. For New Orleans .- Capt. Fuller's fine new steamer Gen. Pike, leaves for New Orleans this

morning. The Eunice .- The excellent and light-draught steamer leaves for St. Louis this evening. She will also take passengers and freight for the lower Mississippi and New Orleans, and trans-

fer them at Cairo to the splendid new steamers St. Charles and St. Nicholas, which left Portland yesterday. The Rescue leaves for Memphis to-day, the V. K. Stevenson and Kate Sarchet for Cairo,

and the Cremona for Nashville. The St. Louis News, of Friday evening,

At this point the water is falling at about the rate of from one to two inches per day, with a channel depth of from nine to ten feet to Cairo. Upper Mississippi is falling, with thirty inches on the Lower Rapids, and the weather in the vicinity of Galena, Dubuque, and St. Paul is becoming quite cold. The Arcola, that came in this morning, left considerable floating ice in the river between St. Paul and Dubuque, and was compelled to break the ice in Fevre river, to get into Galena. Fevre river is by this time frozen over. It has been frozen over every night for sometime past, but the boat that arri ved in the morning was enabled to break through it without difficulty. The officers of the Oma-ha, that came in from St. Joseph this morning, found the river full of heavy floating ice at Weston and St. Joseph, and the weather quite celd. There is no change to notice in the Illinois river.

The Rock City, punctual to her time, arrived last evening. Capt. Bunce knows how to put her through. Mr. Egan has our thanks for a copy of the manifest. he Pittsburg Journal gives the dates and the

stage of the river on which navigation was resumed for the last eleven years, viz:

| 1845-Sept. 28-4 feet & inches. | 1851-Nov. 18-4 feet. | 1846-Qot. 13-14 feet. | 1852-Nov. 18-7 feet. | 1847-Sept. 27-6 feet. | 1838-Nov. 1-5 feet & inches. | 1838-Nov. 18-5 feet. | 1835-Sept. 27-5 feet & inches. | 1835-Oet. 0-7 feet. | 1855-Oet. 0-7 feet. | 1855 DIRECT TRADE WITH EUROPE. - The success

of the voyage of the Dean Richmord from Chicago to Liverpool, having demonstrated the practicability and profit of the St. Lawrence route, business men are disposed to follow up the experiment. Messrs. Cameron, Barry, & Co., Foreign Marine Brokers in Chicago, advertise for two vessels for Europe, one to load lumber on Lake Huron or Lake Erie for a port inside the Straits of Gibraltar, and not higher up than Valencia, with return cargo of Fruit and Wine, direct to Chicago; the other to load at Chicago and Milwaukie, for the United Kingdom, immediately on the opening of navigation. In publishing the advertisements for vessels to charter, the Chicago Trihune remarks:

Let not the outside barharians in New York, Boston, Philadelphia, and Baltimore, imagine that all this is a joke. From the successful be-ginning which Chicago has already made, the business to which there brief advertisements point, will yearly grow in importance, until be-fore the lapse of a decade our port will boast of more foreign arrivals annually than are now reported in any one of the Atlantic or Gulf cries of the Slave States. It is a bold and con-fident prediction; but we shall see its realiza-

IMPORTANT BOUNTY LAND DECISION .-Since the service of the U. S. army proper, in Mexico, the Pension Office has ruled that there has been no war, notwithstanding the severe and protracted conflicts with the Indians on the Pacific coast, in New Mexico, and on the plains, and has rejected all applications hased upon the service referred to. The Secretary of the Interior has reversed the decision of a former Commissioner. The following is an extract from the Secretary's opinion:

I have carefully examined the question involved in the appeal of J. Y. Bryant, from the decision of the Commissioner of Pensions upon the claims of Michael Hesion and James Demsey, Sr., of the U.S. army, for bounty land for services in the Rogue River War, so called, and upon the like claims of William O'Brine and James Demsey, Jr., for their services in the "Apachi War," and "Navijo and Apachi War," respectively so called; and having considered the same in connection with the report of that officer thereon, of the 15th inst., am of the opinion that a liberal construction should be given to the act. The fact, not merely the name, should govern the decision. The question, in my judgment, is, were these men actually engaged in what was really a war? By referring to the hounty land laws, end the various amendments thereto, it will be perceived that Congress in-tended to provide for all cases where the circumstances actually constituted what might with propriety he styled war, in which life was imminently imperiled. There is not that close analogy hetween the pension and bounty land laws, which would safely make the decision upon the former precedents in regard to the principles which should govern the latter, as seems to be intimated in the report.

Things in Kansas.-Kansas outrages have heen superseded by Kansas speculations. restoration of peace and order in the Territory is attended by the most deneficent results. Handreds and thousands are flocking thither to secure lands on which to locate in the spring. A

cure lands on which to locate in the spring. A great many land buyers from Kentucky have passed through this city lately, to attend the great Delaware land sale next Monday. Some of them are speculators, but the greater portion contemplate settling in the Territory.

Kansas will, no doubt, in another year have the population requisite to her admission into the Union as a State, and the application will be made to the next Congress, which is largely Democratic. The prospect is that it will be a slave State.—St. Louis News, Nov. 14.

MONDAY EVENING, NOV. 17, 1856.

THE PATH OF THE OCEAN TELEGRAPH .- A Washington letter states that Lieut. Berryman, who was sent out by the Navy Department, in the ship Arctic, to ascertain the depth, by soundings, from Newfoundland to Ireland, with reference to the practicability of a submarine telegraph, has submitted his report, together with the maps and charts, to the Navy Department, which will be published in the reports accompanying the Secretary's annual report. It is very brief and to the point. He starts out by making soundings every thirty or forty miles, varying from one hundred fathoms to two thousand and seventy-five fathoms; no place beyond the latter figure-that being the deepest point. In almost every sounding he brought up various kinds of curiosities, such as shell 1 of every description, gravel, quantities of mud, &c., all of which have been deposited in the Smithsonian Institution.

On his return he made the same experiments of soundings with the same success. Nowhere did he find any obstructions or impediments in the way, and establishes clearly and conclusively and beyond the shadow of a doubt, in his judgment, the practicability and feasibility of the submarine telegraph between these two points. He says that the whole thing can be accomplished in ten days after everything is in readiness. During the month of July, in his further says that the wires would sink down into soft muddy bottom, and that nothing could possibly interfere with them. This settles beyond all question the practicability of connecting the two continents by a submarlne telegraph.

Congress .- According to the best calculation that can be made, the Senate of the United States for 1857 will stand as follows: Buchanan 37, opposition 23, uncertain 2-total 62, with a Democratic majority of 14. The House of Representatives of the (new or) Thirty-fifth Congress will be about as follows: Buchanan 132, opposition 102; (probably) Democratic majority 28. The figures may vary a little from the above, but a fair working majority must be conceded to the Democrats. There have been already chosen to the 35th Congress 66 Democrats and 86 opposition, giving the latter 20 majority; elections are yet to be held in Alabama, Georgia, Louisiana, Mississippi, North Carolina, Tennessee, Taxas, and Virginiz—all probably Democratic, in Kentucky geon is Mr. R. T. Maccoum, and the secretary, and Maryland partly Democratic, while Rhodel Mr. Ous, and Maryland partly Democratic, while Rhode Island, New Hampshire, and Connecticut will probably elect opposition members. From the above named States in the present Congress, there are 43 Democrats and 39 opposition; present majority for the former 4.

At a distribution of prizes in a German village, a little girl seven years old, whose parents had just been turned out of their lodgings, because they had failed to pay their rent, was asked by the rector-"Have you studied sacred history, my child?" "Yes, sir." "Do you know the history of creation?" "I know that God made all." "Why were Adam and Eve turned out of Paradise?" The child hesitated a moment, and then fixing her eye on the examiner, replied, "Probably they were turned out because they could not pay their rent!"

"Symmes's Hele"-Its Origin.-Most of cur readers have doubtless seen allusions to the theory of Captain Symmes, who maintained that the world is hollow, with an opening at the poles. The following copy of one of his circulars will explain his theory:

CIRCULAR. Light gives Light to Light Discover-ad infini-

tum. St. Louis, Mo. Territory, North America, April 20, A. D., 1818

To all the World: I declare the earth is hollow and habitable within, containing a number of solid concentric spheres, one with the other; and that is open at the poles twelve or sixteen degrees. I pledge my life in support of this truth, and am ready to explore the hollow, if the world will support and aid me in the un-

dertaking
JOHN CLEVES SYMMES, of Ohio. N. B. I have ready for the press a "Treatise on the Principles of Matter," wherein I show proofs of the above positions, account for various phenomena, and Dr. Darwin's golden secrets. My terms are, the patronage of this and the New World. I dedicate it to my wife and her ten children. I select Dr. O. H. Mitchell, Sir H. Davy, and Baron Alexander de Humboldt as my protectors. I ask one hundred breve companions, well equipped, to start for Siberia, in the fall season, with reindeer and sleighs, on the ice of the frezen sea. I engage we find warm and rich land, stocked with thrifty vegetables and animals, if not man, on reaching one degree northward of latitude 82. We will return in the succeeding spring.

J. C. S.

To his Excellency Gov. Wm. Clark.

The above is copied into a number of Niles's Register, for 1818, from an Ohio journal, which vouches for Symmes as a man of intelligence and respectability.

THE MOON .- Dr. Scoresby, in an account that he has given of some recent observations made with the Earl of Rosse's telescope, says:

With respect to the moon, every object on its surface of one hundred feet was now distinctly to be seen, and he had no doubt that, under favorable circumstances, it would be so with objects sixty feet in height. On its surface were craters of extinct volcanoes, rocks, and masses of stones almost innumerable. He had no doubt that if such a building as he was then in were upon the surface of the moon, it would be rendered visible by these instruments. But there was no signs of inhabitants such as ours, no vestige of architectural remains to show that the moon is or ever was inhabited by a race of mortals similar to ourselves. It presented no appearance which could lead to the suppono appearance which could lead to the suppo-sition that it contained anything like the green fields and lovely verdure of this beautiful world of ours. There was no water visible, not a see, or river, or even the measure of the reser-vier for supplying town or factory; all seemed desolate.

SAILING OF THE BRITISH BARK RESOLUTE-Her Appearance—List of Officers.—The Bri-ish Discovery Bark Resolute sailed yesterdey at noon, from the Brooklyn Navy Yard, under the command of Capt. H J. Hartstein, one of the officers of the late Arctic Expedition, for Portsmouth, England, where she will be deliv-ered into the hands of Her Majesty's Government as a present from the Government of the United States.

The singular history of the Resolute must be fresh in the recollection of our readers. It will be remembered that she was dispatched by the British Government in search of Sir John Franklin and was frozen in among the icebergs; that her officers and crew had to abandon her, leaving all their effects on board; that she was found several months ago by the crew of a whaling vessel belonging to New London, Ct., having drifted about 1,200 miles from the spot where she was abandoned. Nor will it be forgotten that the sum of \$40,000 was appropriated by our own Government for purchasing her from the fortunate whalers of New London the Erglish Government having waived all

She has been repaired and filted with the utmost care at the expense of our Government, with the design of restoring her to the Queen in at least as good a condition as she was in at the time the exigencies of their situation compelled her crew to abandon her. With such completeness and attention to detail has this work been performed, that not only has every-thing found on board been preserved, even to the books in the captain's library, the pictures in his cabin, and a musical box and organ belonging to other officers, but new British flags have been manufactured in the navy-yard to take the place of those which had rotted during the long time she was without a living soul on board. stem to stern she has been repainted; her sails readiness. During the month of July, in his and much of her rigging are entirely new, the judgment, is the time it should be done. He muskets, swords, telescopes, nautical instruments, &c., which she contained, have been cleaned and put in perfect order. Nothing has been overlooked or neglected that was necessary to her most complete and thorough renovation. Several thousand pounds of powder which were found on board will be taken back to England, somewhat deteriorated in quality, but still good enough for ordinary purposes, such as firing

Her massive build surprised every one of her numerous visitors while she remained at the Navy Yard. Her upper deck and between-decks are double planked throughout, while her bows and sides are of three thicknesses. Her builders had regard to the comfort of her officers and crew in the Arctic Seas. Under every berth runs a steam-ripe, and through the entire length of the cabins and between-decks are rows of pipes, three feet in diameter, which must have effectually heated the vessel, even when the thermometer fell to 60 or 70 deg. be-The pipes in question connected low zero. with a huge furnace, which also served as a

cooking range.
The officers appointed by the Government to conduct the Resolute to England are — Commander H. J. Hartstein, Lieuts. C. H. Wells, E E Stone, and Hunter Davidson. The sur-

The Resolute is undoubtedly a slow sailer, and it is not expected that she will reach Portsmouth under forty days. The reception which will be given to her officers and crew will, undoubtedly, be worthy of the generous conduct of the American people.

New York Times.

MORE ABOUT THE LOST STEAMER LYON NAIS.

NEW YORK, Nov. 15. The Lyonnais had the following passengers: fis. Damer M. Solomon, Mrs. Strong, Mr. Mis. Damer M. Solomon, Mrs. Strong, Mr. Bailey and lady, Philip Dugleume, J. F. Bassford, lady, childen, and servant, Don Dies Comos, Jose D. Ulate, lady, and servant, Botas Commos, Jose D. Ulate, lady, and servant, Herman Huber and servant, Albert Sammer, lady, daughter, and servant, T. G. Gibson, Mr. Snedell and lady, Mr. Van Ruis, C. Baugrand, E. De Montigny, Mr. Traburoa, Mr. Occello, Lawrence Martin and child, E. Ravoit, Rev. John B. Cccaque, Saul Lospartos, A. Louette de B. Cccaque, Saul Lospartos, A. Louette de Lestrange, A. Frollein, Madamoiselle Ernestine Bellet—39 cabin passengers, and there were on board, including officers, crew, &c., near 150

On the night of Sunday the 2d inst., while in a dense fog, the Nautucket Light ship bearing N. N. N., and distant 60 miles, the ship was run into by an unknown vessel and her stern cut clean off. Nothing more was seen of the unknown vessel, and it is probable that she went down immediately

The Lyonnais remained with her afterpart full of water and her bow high out of water. All hands stood by the wreck until the next day, when it was abandoned. The ship was provided with six boats, only one of which was a life-boat, that boat has been heard from. On the following Monday morning, after it was resolved to abandon the wreck, a raft was

constructed, and about 40 persons took refuge It is the opinion of the second officers that this raft could not have lived through the rough weather that succeeded, and must have been

broken to pieces and all lost. In another boat was the commander with some of the passengers. It was the intenton of the captain to pull for Montauk Point.

DREADFUL FRAUD IN WISCONSIN .- There is nothing like a startling novelty to attract at-tention—and one of the most startling on record has just been "set up" by the Banner und Volks-freund or "Banner and Friend of the People," a Democratic paper, published in Wisconsin. According to the Banner, the elections in Racine as well as in Walworth county, Wisconsin, were actually carried—illegally—of course, by strong minded ladies, disguised as men who, inspired by a great love for Fremont, carried out their principles by treacherously passing themselves off for specimens of the sterner sex and veting. If this be true—and we never heard that the Banner was in the babit of lying—the ladies of Wisconsin must emphatically be Jessecites of the strongest possible description. Furthermore we incline to the opinion that the Democracy of Racine and Walworth counties must be a brave party indeed and gifted with either excessive gallantry or great blindness, to suffer themselves to be beaten by the fair sex. We have seen tome illegal voting in our own city, but nothing quite equal to an election determined by ladies. Fancy the conversation between two of these votaries to Republicanism, on their return. "Well, Annie, dear—did you vote?" "Oh yes—no trouble at all, love—the mode was wear to the truth. What they only made me swear to the truth. a duck of a man that was who gave us our tickets!" "How many girls did you get to vote?" No wonder that Democracy is at a discount in Wisconsin!

WASHINGTON, Nov. 15. Mr. Pennington, Chief Clerk in the 2d Au

Mr. Pennington, Chief Cherk in the 2d Auditor's effice, was dismissed yesterday, and Dr. Catheart appointed in his place.

The President has been closely occupied foday in the preparation of his annual message. It is said that he will indirectly review his pwin administration, and show what it has accomplished, especially in connection with Forelgn Affairs.

IMPORTANT SUBMARINE EXPERIMENTS .- Trial of the "Nautilus."—Major Henry B. Sears has invented a machine which he calls the Nautilus, which entirely supersedes the necessity for the use of the old cumbrous and inefficient appliances in submarine operations; and yesterday, in response to invitations from the 'American Nautllus and Sabmarine Company, a large num ber of our merchants and scientific gentlemen took an excursion on the steamer Champion to Glen Cove, 'o witness the operations of one of the Nautilus Machines.

A company of officers deputed by the U. S. Navy Department at Washington descended in the Nautilus. While under water they hitched on a block of stone weighing 5 tons and containing 56 cubic feet, returning with it to the surface in 4 min. 30 seconds. After moving through the water about 30 feet, they descended again, deposited the stone, and returned to the surface, having been in the bell 9 min 37 seconds. After this trip, ladies and gentiemen descended a dozen together and expressed them. selves highly gratified with their experience.

The apparatus is a combination of a reser air-pump, stationed at the surface, and connected by flexible hose with the Nautilus, which is in the water. The apparatus may be in various forms; the present is an inverted truncated cone, with a spherical top. It is about ten feet in diameter at the largest part, and eight teet in height. It is made entirely of boiler iron of great thickness. It is independent of suspension, and floats at the will of the operator. There are chambers on both sides of the machine, into which water is admitted when it is desired to sink the machine. By opening a valve in the top, connected with the hose from the reservolr, air is admitted of sufficient density to counterbalance the density of the water outside. The requisite density is determined by proper gauges placed in the side of the operating chamber. The cover of the bottom is removed after these preliminaries, and communication is obtained with the bot-

In order to move where no current exists the operator steps on the bottom and carries the machine with him. In current or tide, capassing from four windlasses inside, bles through the plane of the centre of gravity, to anchors previously placed, admits of move-ment in any direction. In order to lift weights swivel-hook is passed across the Affixing this hook to a stone or other bottom. weight, the water valves are opened, and con-densed air from the reservoir is admitted into the chambers. This expulsion of water exercises a lifting power exactly equal to the weight of the water expelled. As soon as the object is lifted from the bottom, movement in any direction may be made to deposit the weight; water is again admitted. The connection with the air reservoir being always closed except when air is being admitted, the air previously admitted is allowed to escape by a valve arranged for the purpose. The water being again admitted, as stated, causes the ap-paratus to sink and the weight to be deposited The perfect command which the operator has the movements of the Nautilus permits this deposit to be made with the greatest nicety This simple description embraces the whole apparatus.

As steam cannot be carried under water, air of the same density, it is found, may be used as a motive power below the surface, and applied to the working of rock drills, sawing of piles, &c, by a small engine inside the operating chamber, to which the condensed air is carried by hose in the same manner in which steam is carried from the steam boiler to the cylinder. By an arrangement of a chamber upon the side of the Nautilus, holes may be bored in the timber: of a sunken ship, in which eye bolts may be sub sequently placed—to which camels or pontons may, be attached, which, being subsequently filled with powerfully condensed air from the reservoir, will raise the vessel. The lifting reservoir, will rai force is incredible.

The Nautilus is also available in laying masonry under water. The power as developed yesterday, as compared with previous methods, excited estonishment from those most familiar with the business. The Nautilus, floating at the surface, descended in twenty-two feet water, the cover was removed from the bottom, a stone of fifty-six cubic feet welghing about five tons was affixed to the cross-bar, and brought to the surface in four or five minutes; the Nautilus, with the stone still suspended, was then moved between twenty and thirty feet, again descended, deposited the stone, and returned to the surface—the whole time occupied in de-scending, lifting, moving, depositing, and rescending, lifting, moving, depositing, and re-turning to the surface being but 94 minutes. The amount of masonry laid by the ordinary diving bell averages four hundred and fifty cubic feet per day. There may be laid with the Nautilus, if the exhibit of yesterday be the criterion by which to judge, thirty-five hundred cubic feet a day, at a cost of \$35, which is considerably less than the ordinary cost of mason-

ry laid out of water.

By the aid of the Nautilus the topography of the bottom of bays and rivers can be ascertained with ease, the heaviest masonry for sea walls and fortifications laid without difficulty and sunken vessels, of large tunnage, may speedily be brought to the surface. But the uses to which the Nautilus may be

applied may not be enumerated in a paragraph. Its adaptability to the pearl fishery is affirmed by adepts. The introduction of the Nautilus into England will give our cousins a new sensation akin to that produced by the yacht America and the frigate Merrimac. It is, as America and the frigate Merrimac. It is, as expressed by ex-Lieutenant Governor Patterson (now of the Harbor Commissioners), an invention to take money out of John Bull's pocket; for nowhere will it be more quickly appreciated, mo e highly valued, or more extensively used, than in Great Britain.

The Nantilus itself costs shout four thousand

The Nautilus itself costs about four thousand dollars, but for the engines and other ap-pllances all complete, six or seven thousand dollars will be required.

dollars will be required.

United States Coininge for the Fiscal Year.—The deposits at the Mint of the United States Branches and Assay office, for the fiscal year ending June 30th, 1856, were, of gold \$60,085,906 90 (of which \$59,608,609 50 was from California), and of silver \$6,637,523 37 (of which \$294,472 55 was parted from the California gold), making a total of \$65,723,-430 25 in precious metals.

The gold colnings consisted of 1,582,146 double eagles, 107,490 eagles, 365,670 half eagles, 57,100 three dollar pieces, 377,334 quarter eagles, 792,110 gold dollars, 5 659 fine bar (of the value of \$21,956,327 16), 1,065 unparted bars (of the value of \$3,746,136 52), the number of pieces 3,288,585, value \$62,156,413 63.

The silver coinage ceasisted of 63,500 dollars, 6,016 500 half dollars, 6,872,400 quarter dollars, 2,880,000 dimes, 4,500,000 half dimes, 722,000 three cent. pieces, and 162 fine bars—(value \$30,551 04); the number of pieces 21,054,562—value \$5,355,061 04. The copper coinage was 1,745,584 pieces, in cents, of the value of \$17,455 84. The whole number of pieces coined during the fiscal year was 26,088,731, of the value of \$67.527,930 56.

THE AMERICAN FLAG.—It is indeed strange that the people of these United States understand so little of the proper form, proportion of size, number of stripes even of their own national flag, the glorious "Star-Spangled Ban-The standard of the army is fixed at six feet six inches by four feet four inches; the number of stripes is thirteen, viz: seven red and six white It will be perceived that the flag is just one-half longer then it is broad, and that its proportions are perfect when properly The first stripe at the top is red carried out. the next whi'e, and so down alternately, which makes the last red. The blue "field" for the stars is the width and square of the first seven stripes, viz. stripes, viz: four red and three white. stripes extend from the side of the "field" to the extremity of the flag. The next stripe is white, extending the entire length of it, and directly under the field in strong and pleasing relief; then follow the remaining stripes alter nately. The number of stars on the field is now thirty-one, and the army and navy immediately add another star on the admission of a new State in our glorious Union.

No ! I HAVE NOT BEGUN TO FIGHT !- Such was the language of Paul Jones when the British commander asked if he had surrendered. Although his decks were slippery with blood his ship on fire, his guns dismounted, and his colors shot away, Paul Jones, with an immortal heroism, kept up the battle! "Do you surrender?" shou:sthe English captain, when he saw that the colors of the "Bon Homme Richard" were gone from the masthead. There was a lull in the conflict for an instant—

"And the boldest held his breath,"

as Paul Jones, covered with blood and powder stains, waved his sword and gave his memora ble answer: "No! I have not begun to fight! And the result was, that the battle changed, and in a few monents the British frigate struck her colors and surrendered, and Paul Jones, leaping from his own sinking vessel, stood victorious upon the royal deck!

GREAT BARGAINS-REDUCED PRICES .- Miller & Tabb, corner Fourth and Market streets, are offering a large stock of handsome velvet, cloth, moir antique, and plush Cloaks at greatly reduced prices-lower by 25 per cent. than the same goods can be found in any other weather nouse. They are also offering a large siot of fancy Silks, printed Merinos, De Laines. Cashmeres, Shawls, Flannels, Linens, Jeans, plaid Linseys, Satinets, linen Table-cloths, Napkins, Hosiery, &c., &c., at unusually low prices. We would advise our friends, especially the lad:es, to call at this house before they make their purchases, feeling satisfied they will be n15 j&5 repaid for their trouble.

A Big Majerity.—A unanimous vote in these days of high political excitement, when the whole country is divided and subdivided into political and religious organizations, is a result scarcely expected by many persons. But that such an event has really occurred is clearly proven. And it is an undeniable fact that on one subject the vote is unanimous, and that all parties, old and young, native and foreign, bond and free, who have tried Porter's Oriental Life Liniment, pronounce it to be a valuable remedy for the relief and cure of rheumatism, pains in the back and shoulders-it has been used with the greatest success by thousands-and for the permanent cure of old sores, tetter, ringworm, bruises, cuts, sprains, and frost-bites it is o31 i&bd&wtf fallible.

A RARE OPPORTUNITY -Bent & Duvall's Goods at Cost .- Messrs. Bent & Duvall have determined to sell out their large stock of goods at cost. It embraces one of the finest assortments of embroideries, siiks, carpets, linens, furnishing goods, &c., ever brought to this city. The proprietors are genlemen of standing and integrity, and they will most assuredly carry out what they promise. The cost of every article is labelled on it in figures, so that the purchaser may see it for himself.

Messrs. B. & D. have been induced to this arrangement in consequence of a contemplated change in the firm on the 1st of January. We are gratified in being able to say, however, that: the house will not only be continued, but that it will be materially enlarged thereafter.

Mrs. J. L. Deming, whose powers of song have been very highly spoken of by the press wherever she has appeared, will give a concert in Louisville to-morrow evening. Mrs. Deming is a poetess of great merit as well as an accomplished singer.

From the high praise awarded to Mrs. Deming wherever she has sung, we anticipate a rich musical treat at her concert here. Among others of our exchanges which compliment her very highly, the Rochester Advertises says:

Her appearance is an event in musical annals. From the first notes she sang, as from the first words of Goldsmith's Traveler, we felt in the Co., agents for Louisville. Scribner & Devol, gift of nature, has sweetness, extent, and power, and would alone have given her celebrity; but, with Mrs. Deming it is the least of her qualifications, for she has all the greater ones, which go to make a great artiste—such an ar-tiste as there are but few in one generation. She sings from her soul, and moulds the souls of her hearers to her will; she controls her voice with consummate art, and has the most exquisite and refined taste.

AMUSEMENT.

BY TELEGRAPH.

Reported for the Bulletin.

PHILADELPHIA, Nov. 17.

The steamer Texas, from San Juan, via Key West, has arrived. She connected with the Sierra Nevada, which left San Francisco on tle 20th.

the 25th and Sonora on the 24th, both bound for San Francisco

Among her passengers are Don Ferdin Ferrer, the new Nicareguan Minister to Washington, Mr. Wheeler, American Minister to Nicaragua, and Col. Fabens, a bearer of dispatches from Gen. Walker.

The dates from Grenada brought by the Texas are to the first instant.

Matters in Nicaragua had been quiet since the battle of Masaya. General Walker was awaiting the arrival of the expected recruits before marching again upon Masaya and Leon. Gen. Hensinger, who superseded Goicura, was drilling the army in the use of mountain how-itzers and Minnie rifles. The whole army now numbers 2,000 men, and they were all in good spirits and eager for an engagement with the enemy. It was thought a decisive battle would be fought at Masaya about the 10th of No-

State is to be commenced shortly undr Prof. Jas. T. Hodge. RISING SUN, Ind., Nov. 17.

The steamer White Bluff, with a full cargo for Nashville, struck a snag, above this place, WASHINGTON, Nov. 16.

A meeting of the Republican Association of this city was held last evening. Resolutions were unanimously passed for the continuance of their organization upon the principles of their old platform and those of the Philadelphia

dress and resolutions of a congratulatory character to the friends of Fremont and freedom and urging upon them the importance of keep-ing up their local organizations. Remarks were made laudatory of Col. Fre-

mont and expressive of gratification at the result of the election in the free States, but the association deemed it injudicious at this time to make any presidential nomination for

It appeared by the Secretary's report that the Washington Republican Association had published and circulated about four million documents during the campaign, comprising 80 different kinds. Among them were 100,000 copies of Blair's letter, about 300,000 copies of Mr. Seward's speech, 210,000 copies of Mr. Sumner's crime against Kansas, 143,000 copies of Senator Wilson's speech, and 146,000 copies of Mr. Cifon's proceedings of Mr. Senator Wilson's speech, and 146,000 copies of Mr. Cifon's procedure of Mr. Senator Wilson's speech, and 146,000 copies of Mr. Cifon's procedure of Mr. Senator Wilson's speech, and 146,000 copies of Mr. Cifon's procedure of Mr. Senator Wilson's speech, and 146,000 copies of Mr. Senator Wilson's speech, and Mr. Senator Wilson's speech, and Mr. Senator Wilson's speech, and Mr. Senator Wilson's speech will s of Mr. Coifax's speech, together with 165,000 copies of the Kansas Investigating Committee's

tour in search of the birth-place of the Chief Police, proposes to write his own life. Not. Cowever, being exceedingly flush pecuniarily. but quite the contrary, he thus appeals to the moble citizens of Gotham:

I am about to write "The Cheerful Sunlight of Life," leaving its dismal shade to the just

After I am cold and mum, In the drear Mensoleum.

As the Board of Councilmen of New York have robbed me of nearly \$5,000, my pockets rather vacant. Therefore, if some noble with rather vacant. Therefore, if some noble ratiren will loan me the means to sustain me while I write and publish my life, I will most assuredly cancel his claim when I sell my books, and be forever grateful to him for his bradness and generosity. My auto-biography will begin with the very instant of my birth (as imparted to me by my old aunt Lucy, who was on the spot), and close with the last moment of my existence, including the history of the property o all my travels and pronunciamentoes, with ma-my di-sertations never promulgated. If the anitalist to whom I now appeal, desires a share of my enterprise, for a consideration he shall be gratified. Please address me through the Massau street Post Office, without delay, as I desire to publish my life for Christmas and New Year's.

Isourist.—An inquest was held yesterday morning, at the Sulphur Well, on the body of Gadeon McDowell, a blacksmith, who lived on the Preston street plank road, about five miles them the city. The deceased and Wm. Powell, a young man of the same neighborhood, met at a supplier Well late Saturday evening, and an altercation ensued, growing out of offensive language previously used by Powell. The deceased received a wound near the left eye, fracturing several inches, which caused his death in a few minutes. Verdict—"Came to his death a few minutes. Verdict-"Came to his death from the effects of a wound inflicted with a knife or other sharp-pointed instrument whilst cargaged in a difficulty with William Powell."

W. LEE WHITE, Coroner.

We learn from the coroner that McDowell Maves a wife and five children in a very depend-

We have the details of the foreign news per Europa, but we do not find anything of great interest in them. The New York Times says of the intelligence:

The Neapolitan question has diminished in importance, paled before the splendors of a new quariel in which Austria, England, and Turkey are the parties. There are very contradictory reports in relation to this matter. It seems to conceded, however, that a demand has been made by the Porte upon Austria for the evacuation of the Danubian Principalities, and upon Great Britain for the evacuation of the Black Sea, but that by a mutual understanding both powers refuse to leave. Under these circuman importance above all others. Relations between England and France are not so barmonious but that the presses of the two countries find occasion to animadvert with sharpness upon the affairs of the ailiance, and there are dark hints of a leaning toward a secret understanding between England and Austria. The fact that Austria and England both refuse to accede to the demand of the Sultan indicates that there is some coloring of truth in this last sumor. Sir Charles Napier has written a reply to Sir Robert Peel's after-dinner speech, defen ing himself from Sir Robert's assaults. The habilities of Fox, Henderson, & Co., the Crystal Palace contractors, whose failure was answered by the last arrival, are stated at £350,-

ARRIVAL OF THE GEORGE LAW. From Central America. - The Panama Star and Herald of the 1st inst. furnishes the followag parrative of a suspension of relations beween Great Britain and New Granada:

By a sailing vessel which arrived at Aspinwall on Thursday from Carthagena, we have received the important information that Mr. Griffith, H. B. M.' Charge d'Affaires at Bogota, having failed to arrange with the New Grana-Government the old standing Mackintoch's claim, has broken off negotiations with the government, and given notice that the Admiral of the British West India Squadron has been or enforce the payment of the claim. Gaceta Oficial of October 11th, thus introduces the rorrespondence:

"Unfortunately a disagreement has arisen with the Government of H. B. Majesty, originating from the non-legislative approbation of the convention arranged on the 24th of November, 1855, to compensate Mr. James Mackin-toch, a British subject, for the damage suffered by him in consequence of not redeeming in the custom house during a certain period, and in sirtue of certain executive dispositions of some portion of the vales of the floating debt of 6 per 200 which he received in payment of his of Columbian origin.

"The Republic is threatened with coercive measures on the part of the British Naval forses, without the Executive Power using its constitutional power having been able to pre-vent it. By its order, and for the information of the nation, it publishes the documents relative to the recent diplomatic controversy on this disagreeable affair. It is to be hoped from the sentiments of justice of the British Government that ere long it will be regulated in a satis-

From Costa Rica the intelligence is to the 6th of October. The Star and Herald says: General Canas was still on the frontier watching the Walker party, and a large addi-tional force is to be sent to join him immediate-by. Private advices state that 1,000 men had dready marched, and 500 to 1,800 more were econ to follow. A public meeting was held on the 5th of October at San Jose, in which it was manimously agreed to carry on the war with sigor. The Boshop of San Jose made an offer to government of all his private property, and many influential citizens contributed largely to the expenses of the war

From Nicaragua the news is no later, than that previously received direct. We have, and granada, which differ materially from the received through the columns of El Nicaraguase, and from the efficers of Walker's army.

A letter from Greytown, under date of October

, says: On the 11th, Walker marched his forces to Massaya, and when within two miles of there
the allied forces came out to meet him, and after some skirmishing retreated to that town,
where Walker received a very warm reception,
so much so, as to think Granada more hospita-

eand the city in possession of a party of morrists from Chantales, numbering some

EVENING BULLETIN.

Den't All Speak at Once.—Mr. Stephen

Branch, one of the local celebrities of New
Tork, who gained extensive no oriety by his

three hundred, who had completely sacked the city, even Walker's private papers coming in their hands, and Granada was theirs were it not that in their cagerness for plunder they neglected the necessary precaution for defence. They stipped Walker of all his clothing and provisions, as well as those belonging to

his arm.

Walker's position is now a critical one, and on his next battle depends his fatc. He receives numerous augmentations and plentiful supplies by every opportunity; nevertheless the desertions from his army are numerous. In the last battie he was 800's rong; the 300 men who occupied Granada made bad use of their time, and thought more of plunder than of duty; had they burnt the town Walker was complete ly rained. The few Americans who were in Granada behaved well, defending the ordnance, guard-house, and hospital.

The ext battle which must be fought at Massaya will probably decide the fate of Central America, and were it not for the jealousy of the native forces there is no doubt on what side the victory would be. In fact they too many generals who quarrel and intrigue among themselves, and neutralize the good they might otherwise be able to effect.

This letter says that the Rev. Mr. Wheeler and Mr. Lawless, who were shot by the invading torce, were taken with arms in their hands.

From California — We have files of San Francisco papers to the 20th of October, four-

we copy the following items from the summary of intelligence prepared for transmissions by the steamer in the office of the San Fran-

On the 7th October, the California American of Sacramento published a letter from Millard Fillmore, dated Buffalo, N. Y., Aug. 30, stating that he still held the sentiments in favor of internal improvements, and particularly the Pacific Railroad, which were set forth in his annual message of 1850

On the 17th, a letter by James Buchanan, dated Wheatland, near Lancaster, Pa, Sept. 19, addressed to B F Washington, chairman of the Democratic State central committee, was pub-lished in the Sacramento State Journal, in which he states that he is in favor of the Pacific Raiload and considers its construction Constitution al and proper on the ground of its being neces-sary for the defense of the country, just as much as the fortifications of the harbor and the appropriations for their erection.

since our last steamer edition several fires some condition. Powell is still at large, but will have taken place. One occurred in Minnesota, Sierra county, which nearly destroyed the town. Fourteen buildings were also destroyed at Gold Hill, about thirteen miles from Nevada Several buildings near Grass Valley, on the Nevada road, were also burned the next day. On the 7th October, a destructive fire occurred a Placerville, by which property to the amount of over \$50,000 was consumed. The city is being rebuilt in very substantial style. Brick building allowed to the style of the substantial style of the substantial style. ings already occupy a large portion of the dis-

trict formerly burnt over.

During the past fortnight rain has fallen in different parts of the State, and snow now cap the Mountains of the Sierra Nevada. On the 8th October, snow to the depth of eight inches fell at Bear Valley, Nevada county. On the Feather river many miners were driven from their claims, and several wing dams and flumes were carried away. Copious showers have also fallen in the southern portion of the State. Ice an inch in thickness was fourmed near Placerville, at Glrizzly Flat. Our miners, farmers, and stock-raises are well pleased. Atable published, showing the number of rainy days in each of the past seven winters, gives an aver-

age of about 61 days per year.

On the 25th ult, at about half-past 11 P. M., severe shocks of earthbuake were experienced in San Diego coun'y. The Indians rnd cattle were much frightened, and sleepers generally disturbed, but no great damage was done.

Troubles with the Indians take accurred near

Troubles with the Indians have occurred near

Humboldt Bay.
It is expected that there will soon be a plenti ful supply of gold from the mines, though this is dependent chlefly upon the weather, plenty of rain enabling the miners to wash out the dirt collected during the summer. The Branch Mint, which had been closed on account of the want of the necessary acids, has been furnished by the arrival of a long expected carge, and is again in full operation.

[From this morning Journal.]

JACKSON, MICH., Nov. 15. A large fire occurred here last night, which destroyed the Empire Honse, Bean & Clark's produce and grocery store, and other property. The total loss is about \$40,000. The insurance is small.

NEW YORK, Nov. 15. The steamer Marion is to be dispatched im-

mediately in search of the steamer Lyonnais.

MONTREAL, Nov. 15. A very destructive fire broke out this after-noon at Three Rivers. One-half of the town

is already in ruins. PITTSBURG, Nov. 15, P. M. The river-28 inches by the metal mark.

Another Territory, we learn, is about to be organized by a portion of its inhabitants. On the first of September, an election was held at various points in the Gadsden Purchase for delegates to the Territorial Legislature of New Mexico, and for a delegate to Congress. latter, it is expected, will present to Congress a petition for the separation of the Gadsden Purchase from the northern part of New Mexico and the erection of an independent Territorial Government. To this post Mr. R. P. Cook was chosen. How much of New Mexico they desire to have included within the new Territory, we are not informed; but the advocates of the separation say that the country is naturally di-vided, by the intervention of deserts and mountains, into two States of governmental jurisdic-tions. The Gadsden Purchase, or Arrizonia, tions. as the residents sometimes style it, contains a total population of perhaps a thousand persons of whom one-halt are Indians, and a third Mex icans of a very low class, the rest are Americans and Germans. The principal village is Tuscen (Tuskone) which aspires to be the capital of the new State. There is a fort in the vicinity of the place, with a small garrison of United States troops.—N. Y. Tribune.

Distressing Occurrence—A Whole Family Destroyed.—A private letter from Morgan county, Ill., informs us that a most distressing casualty, or, rather, scenes of casualties, occurred about three miles from Jacksonville, a few days ago, to which nearly a whole family fell victims. A small girl, daughter of a widow named Ironmonger, while feeding the pigs, having got into the pen where they were confined for the purpose, was attacked by a victous sow and torn so shockingly that she died. A large hole was eaten in her side by the savage beast, and she was otherwise mangled. The shock on the mother at the horrid spectacle, killed her, too. The next night a camphene lamp exploded accidentally, in the house, killing one child instantly and so severely injuring another that it is not expected to survive.—St. Louis News, Nov. 14.

NECHANIOS TOOLS—All the into improvements, fother with a enperier assertance of Builders' fardware for sale by A. Hobbids, @ Taird &.

Terrible Casually .- On Saturday night last, as some of our young men were firing the can-non over the Democratic victory just achieved, a premature explosion occurred by which five osix persons were injured, three of them se-verely. Anselmo Lynas had his area and face budly burnt. He will lose one of his eyes and probably both. Jack Jinkins was similarly burnt and will doubtless lose an eye. John Mills was also burnt in the face very badly. 'ne or two others were injured but not serious ly .- Clarksville Jeffersonian.

An Affray.—We learn that a difficulty occur-red at a school-house in Simpson county, about three miles from Franklin, on Tuesday last, between two boys; one about 20 years of age, whose name is Hogan, and the other about 16 years of age, whose name is White. White and Hogan made a bet on the election, White being a Democrat and Hogan a Know-Nothing. A dispute arose between them, and White cut Hogan in the head with an ax, from the effects of which he died about 8 o'clock that night. White is under arrest .- Bowling Green Gazette.
